

WHAT WE ARE

BLOCKCHAIN-BASED VR FRAMEWORK

THE VIRTUAL REALITY MARKET IS ALIVE AND GROWING:

- SuperData Research shows the Virtual Reality market will be worth \$4.9 billion by end of 2017.
- Projected revenue from sales of content and products in VR markets is set to hit \$30 billion by 2020. (Digi-Capital)
- Facebook's Mark Zuckerberg: "...I'm looking forward to seeing even more great content as VR continues to grow!"

The future of virtual reality markets is certain, but that doesn't mean the growth of the virtual reality market isn't without its issues.

- **Market Problem:**
VR content needed to meet a growing demand is slow in coming due to the long timeframe for development, high costs of creation, and need for expensive hardware.

SOLUTION: A BLOCKCHAIN-BASED FRAMEWORK FOR VR

- Opportunities: Our unique platform allows developers to create high-quality VR content easily; find customers for those ideas within the marketplace; and increase creative VR content within the VR industry through the expansion of an existing offline franchise.
- The platform will be based on blockchain technology, which guarantees an honest and transparent distribution of funds and protection of intellectual property rights. The platform is supported by an entire hub of technical solutions that will allow developers to create their own VR content.

EXPERIENCE

- We offer nine years of experience in IT and the entertainment industry, working in VR since 2015. Our carefully selected team includes high-profile international mentors and advisors.
